Assignment 1

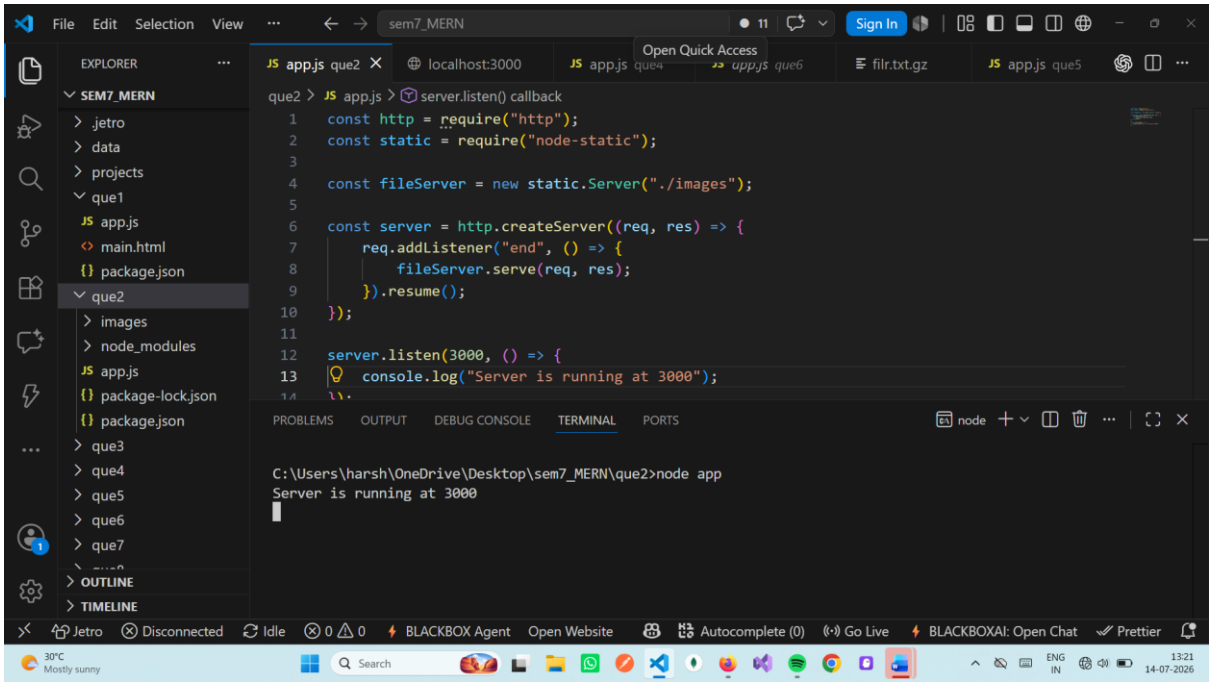

Que 1: Develop nodejs application with following requirements:
- Develop a route "/gethello" with GET method. It displays "Hello NodeJS!!" as response.
- Make an HTML page and display.
- Call "/gethello" route from HTML page using AJAX call. (Any frontend AJAX call API can be used.)

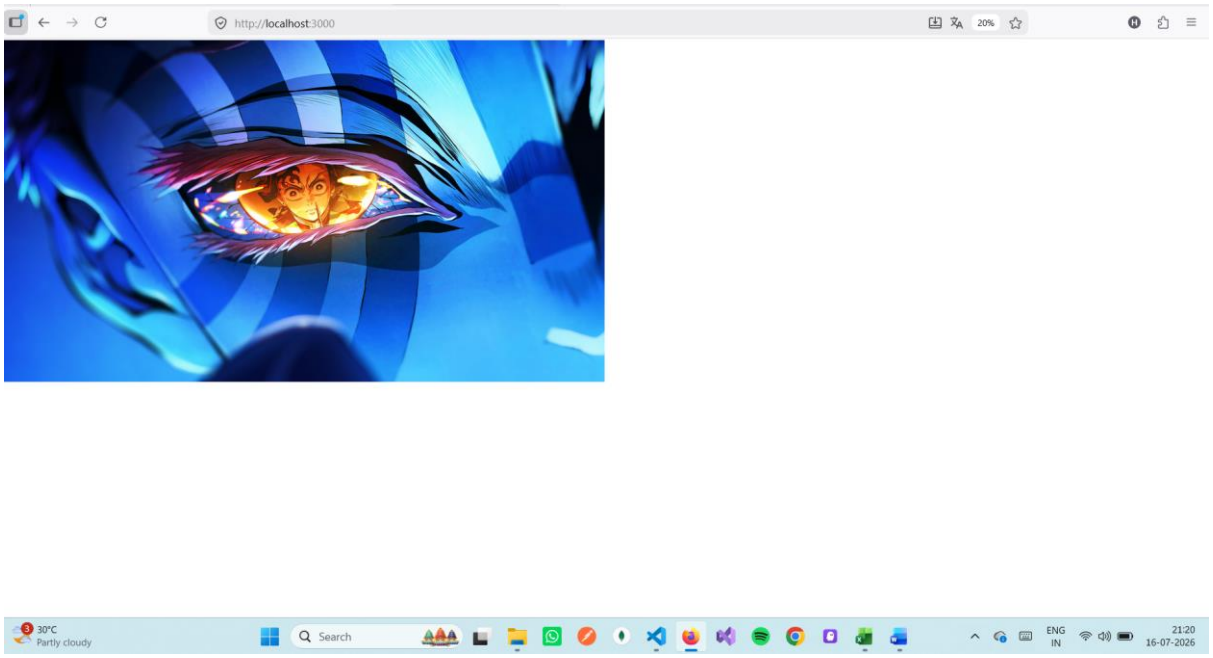

Output:

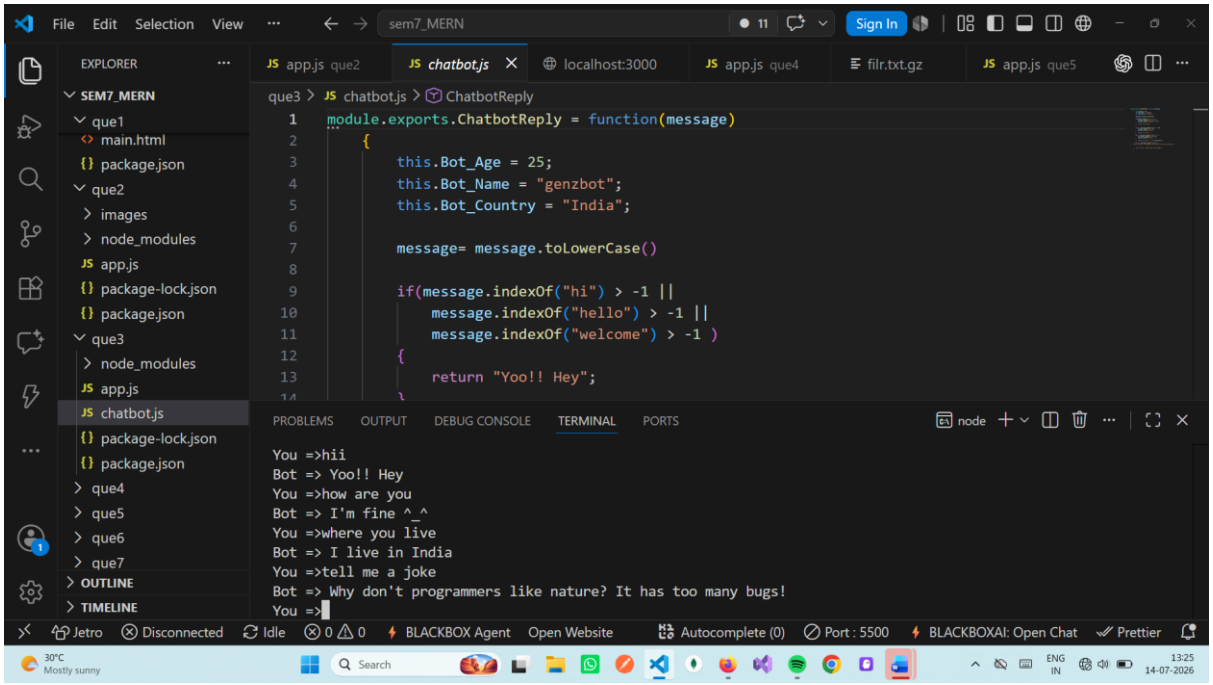

Que 2: Develop a web server which serves static resources.

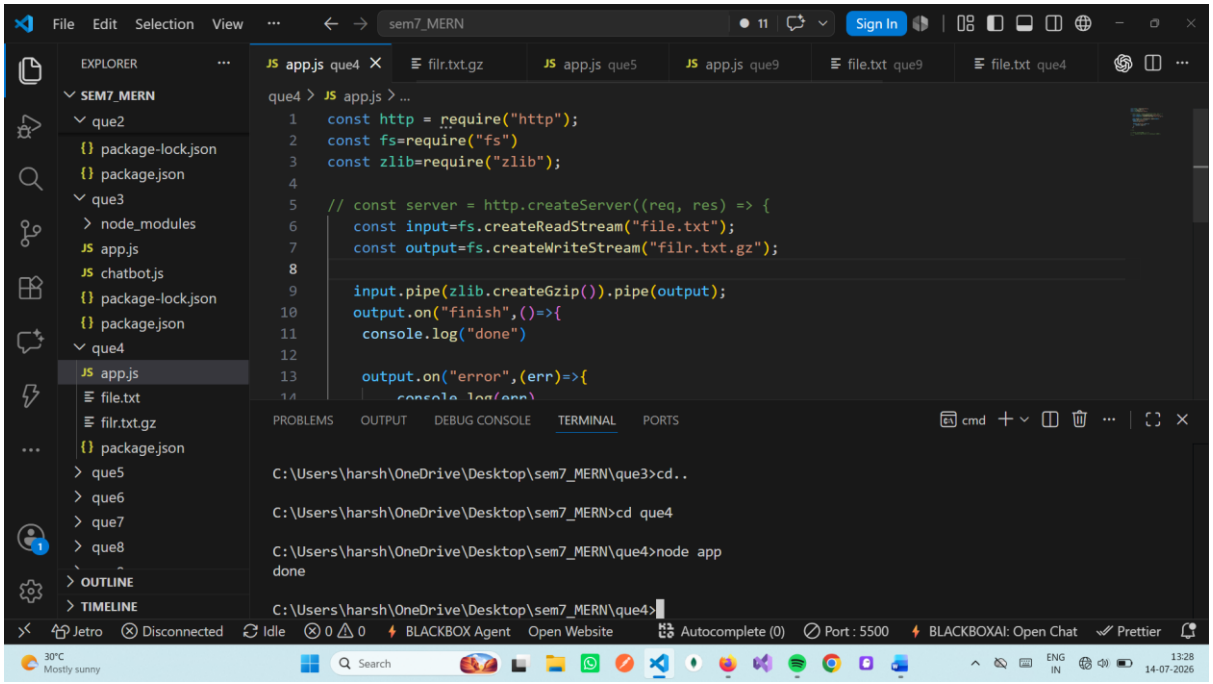

Output:

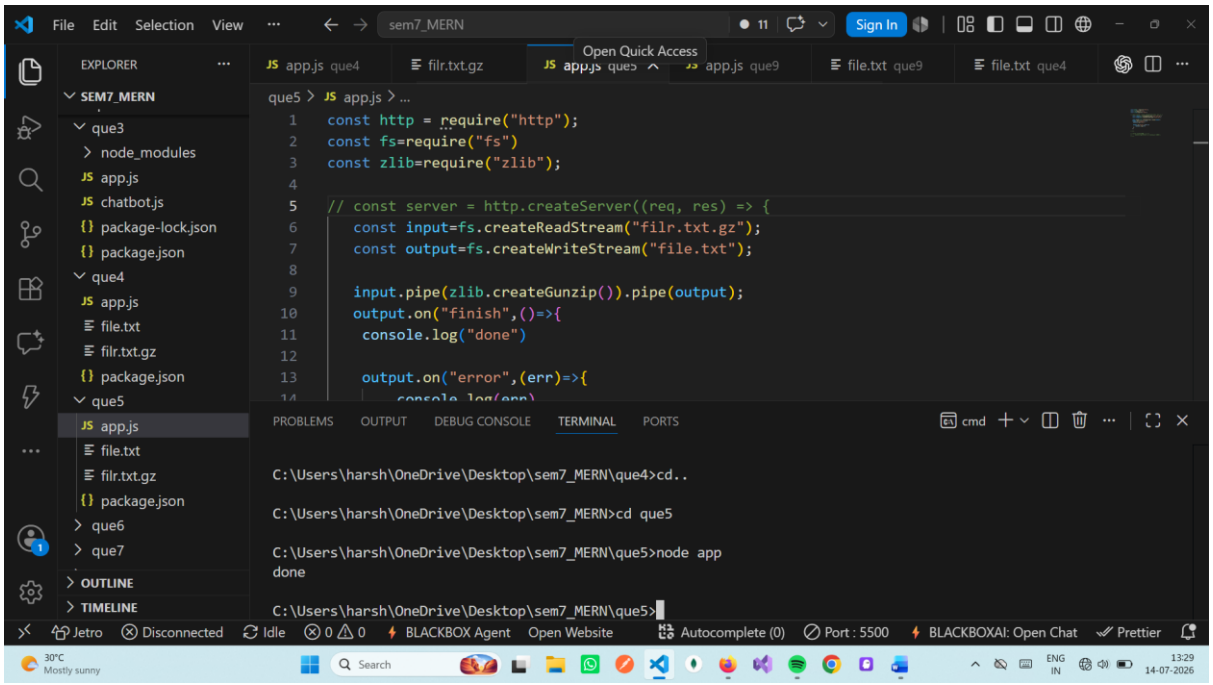

Que3: Develop a module for domain specific chatbot and use it in a command line application.

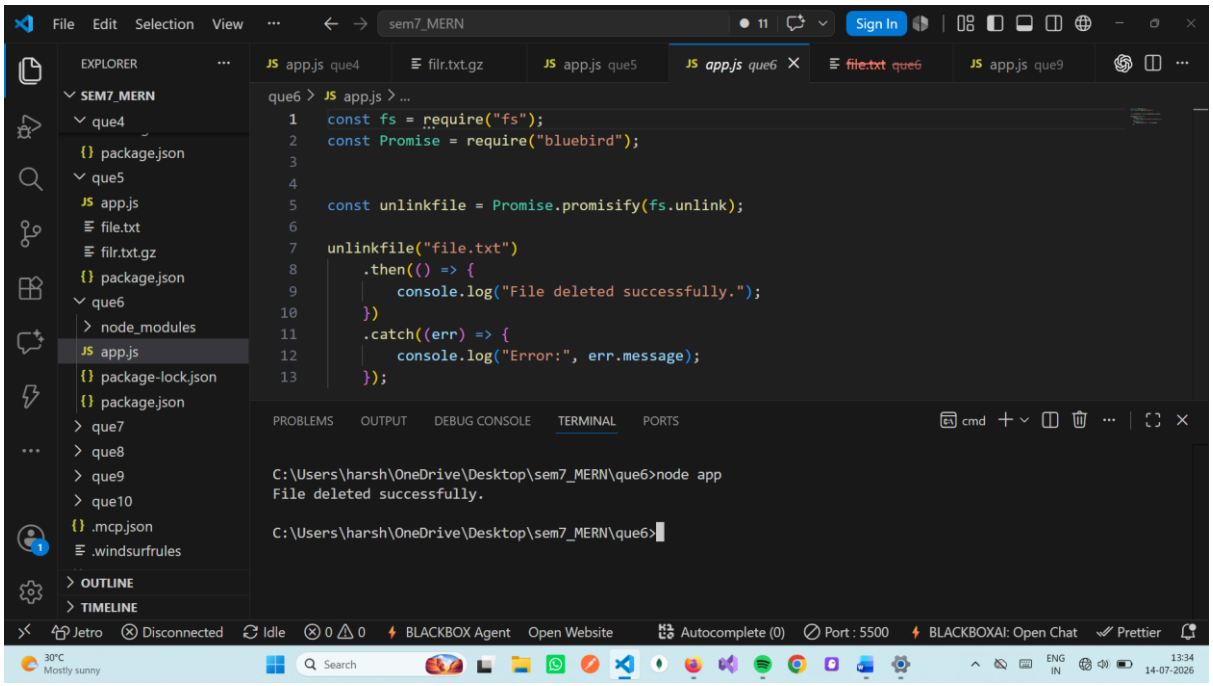

Que 4: Write a program to create a compressed zip file for a folder.

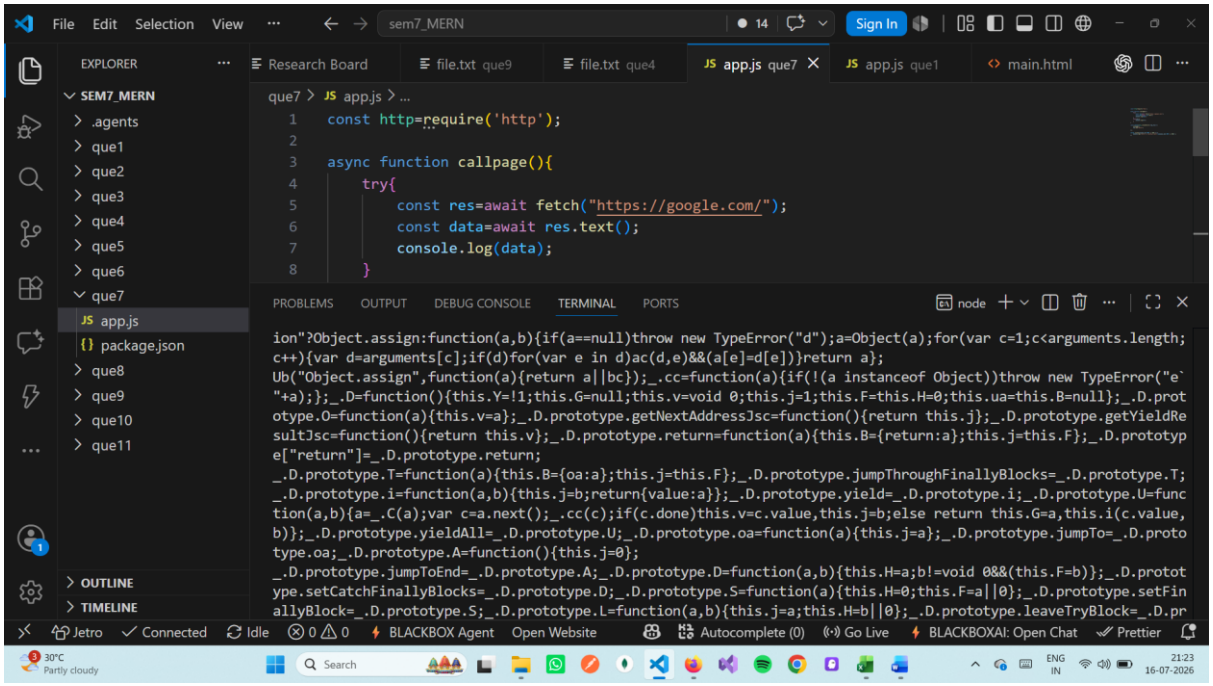

Que 5: Write a program to extract a zip file.

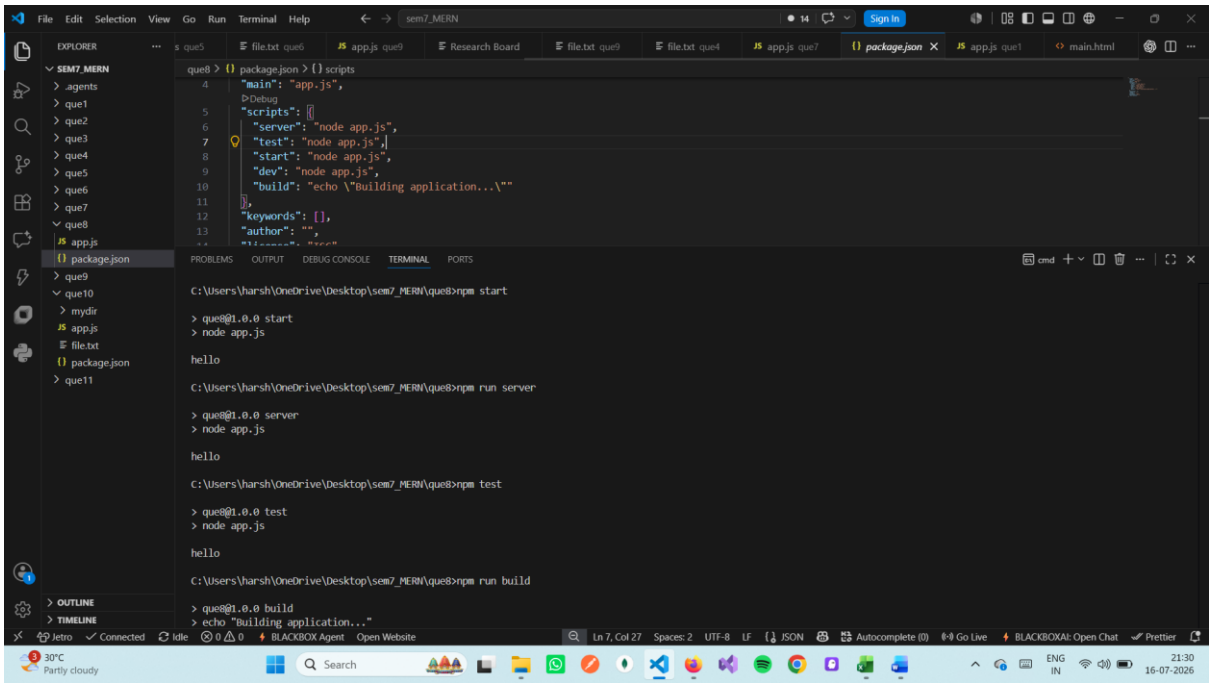

Que 6: Write a program to promisify fs.unlink function and call it.

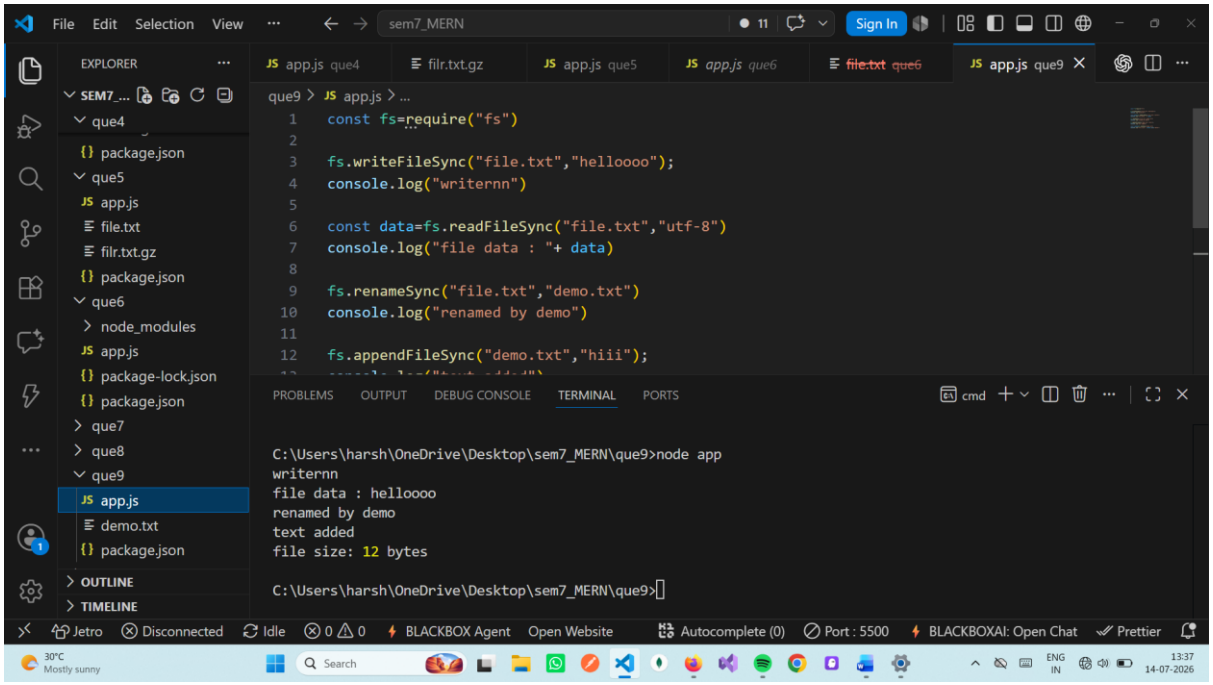

Que 7: Develop a node web server with a route /google which can fetch data of google page using fetch() using async-await model and show as a response.

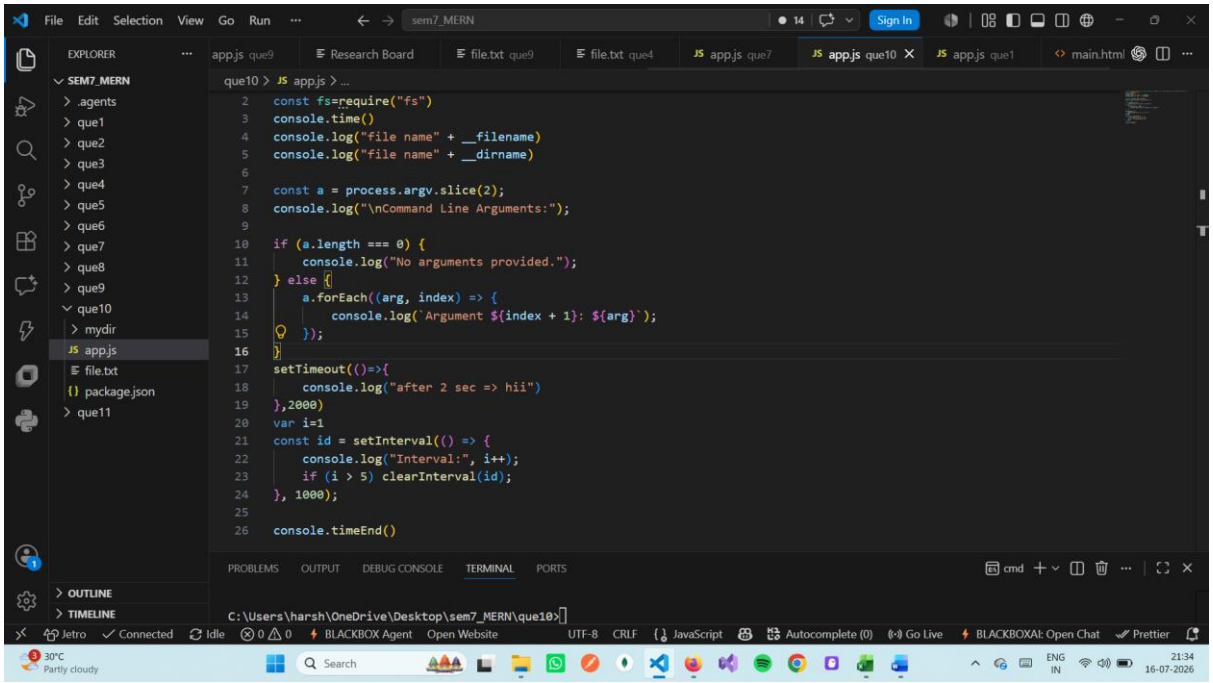

8. Set a server script, a test script and 3 user defined scripts in package.json file in your nodejs

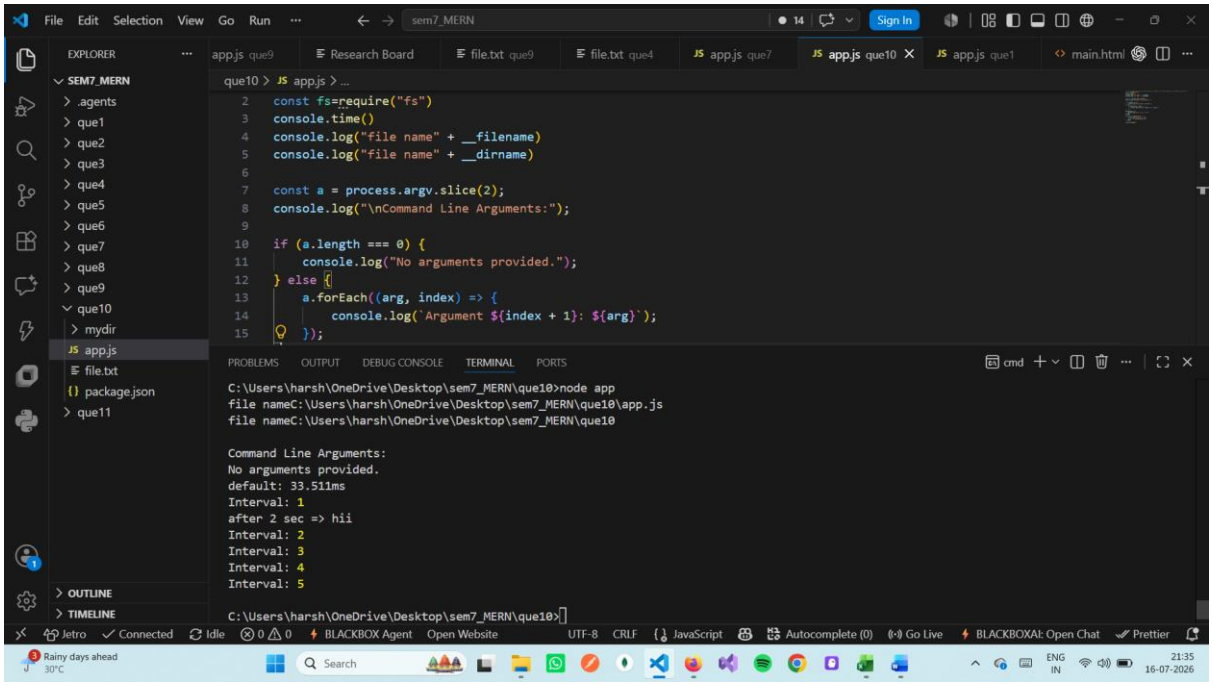

Que 9 : A program which calls useful functions in fs module.

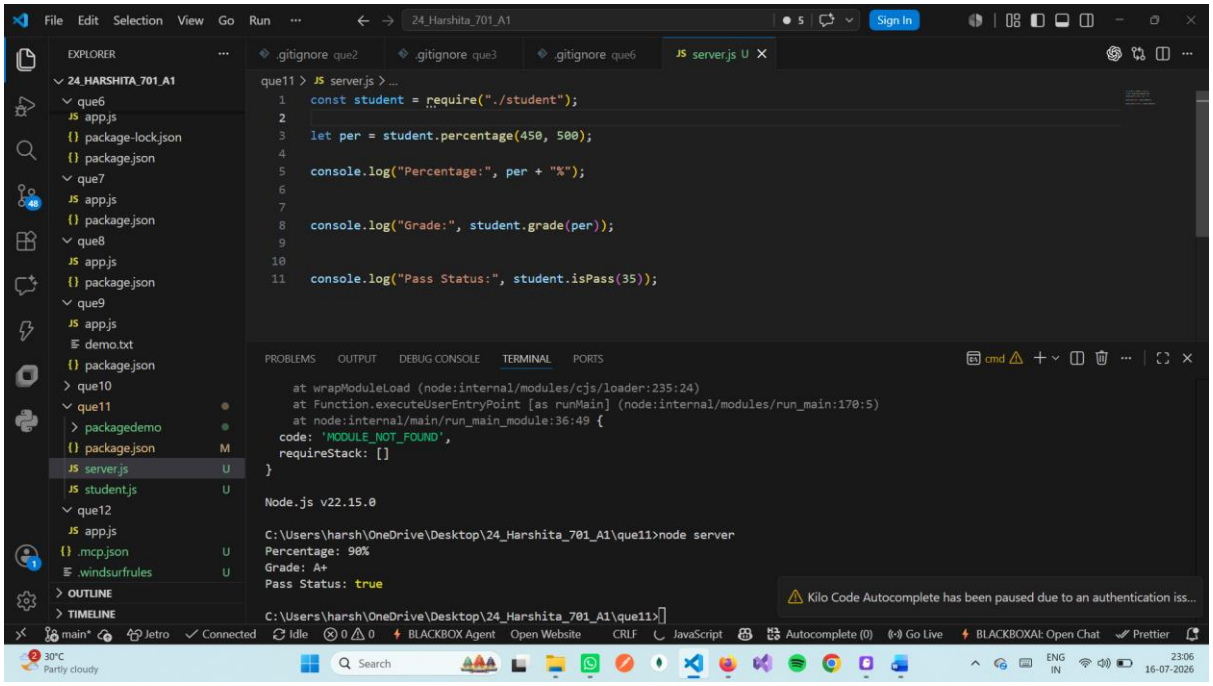

Que 10. A program which uses global objects in nodejs. Also read command line arguments and print it

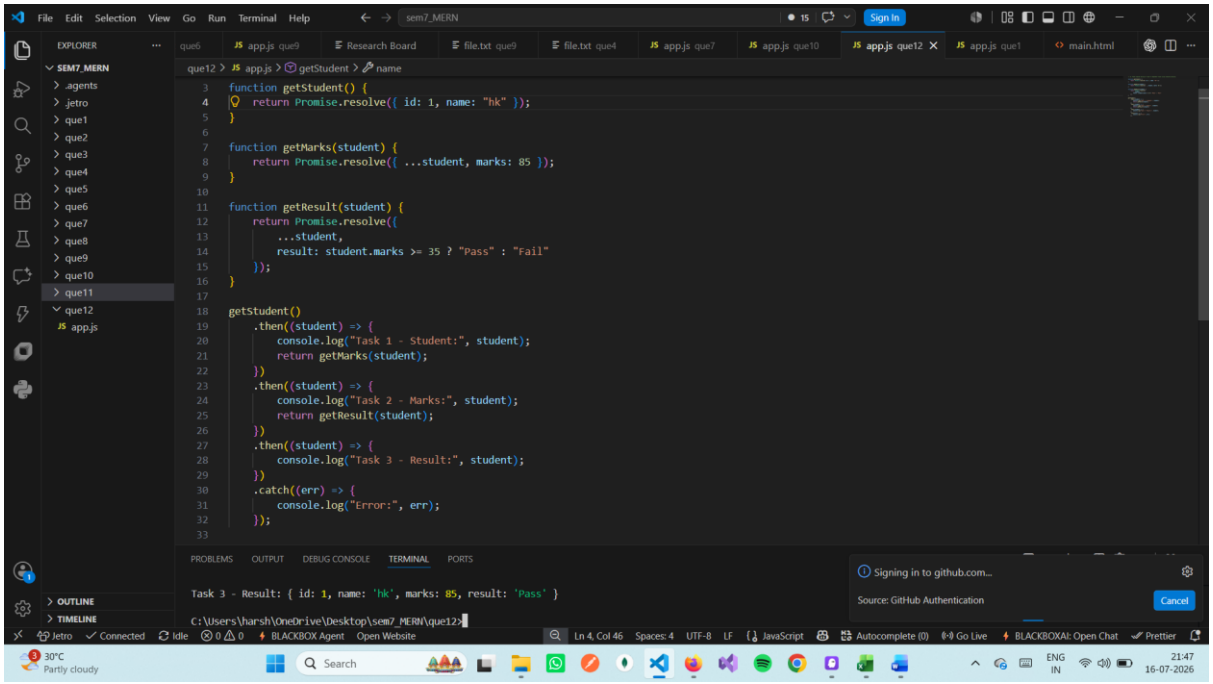

Output:

11. Develop a useful package and publish it on npmjs.com. Write a program to use it.

12. Write a node program having at least 3 dependent tasks and call using chained promises.

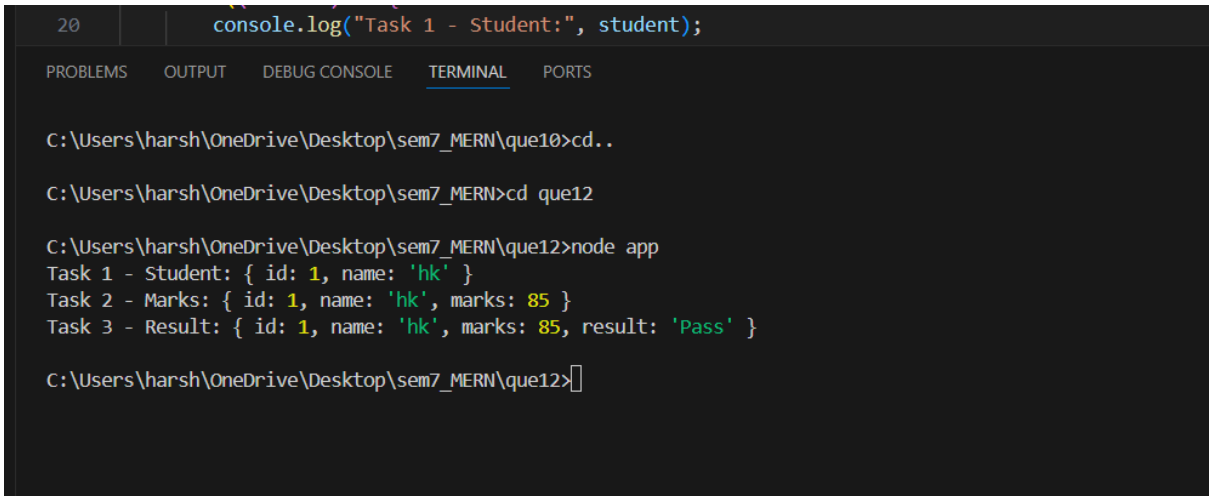

```
function getStudent() {
  return Promise.resolve({ id: 1, name: "hk" });
}

function getMarks(student) {
    return Promise.resolve({ ...student, marks: 85 });
}

function getResult(student) {
    return Promise.resolve({
        ...student,
        result: student.marks >= 35 ? "Pass" : "Fail"
    });
}

getStudent()
    .then((student) => {
        console.log("Task 1 - Student:", student);
        return getMarks(student);
    })
    .then((student) => {
        console.log("Task 2 - Marks:", student);
        return getResult(student);
    })
    .then((student) => {
        console.log("Task 3 - Result:", student);
    })
    .catch((err) => {
        console.log("Error:", err);
    });
```

Output:

```
20        console.log("Task 1 - Student:", student);
